

Energy Casualty

London

Broad energy coverage for unique client risks

Comprehensive energy coverage offering flexible, tailored solutions to address the unique risks your clients face – covering contractors, consultants, manufacturers, transportation and distribution of related products.

Our Energy Casualty team in London delivers bespoke protection for a wide spectrum of energy risks, spanning from traditional energy sectors to renewable resources.

Our program navigates the three energy segments (upstream, midstream and downstream) and includes ancillary services and operations that support our target disciplines. With coverage enhancements and hands-on service, we're a one-stop solution for safeguarding your clients from an abundance of exposed energy risks.
