

Comprehensive online driver training

We don't just believe in training. We invest in it.

Using proprietary claims data, we developed one of the most comprehensive online driver training programs available today. Designed by some of the country's foremost transportation experts, our online driver training modules are specifically formulated for drivers operating:

- Mobile cranes
- Heavy haul/tractor trailers
- Concrete pump trucks

To defend your company in litigation, you will be asked to show you train and document that training. Our learning management system provides this level of documentation.

For enrollment or more details, contact us **877-720-RMSS (7677)** or email [Risk Management@nbis.com](mailto:RiskManagement@nbis.com)

Eradicating high-risk behaviors through training

The Online Driver Training program targets the most common high-risk driving situations and behaviors and illustrates practical ways to avoid them. For mobile crane drivers, concrete pump truck operators, and heavy haul tractor drivers, we offer six customized courses:

- 1 Distracted Driving
- 2 Changing Lanes Safely
- 3 Right Hand Turns
- 4 Stopping Distance
- 5 Backing Safely
- 6 Compliance Safety Accountability

Benefits on benefits

- Updated based on proprietary claims data to the current road hazards faces by these industries
- Training designed by our risk management experts and invokes a reduction in deductible for trained drivers involved in an accident**
- Available 24/7
- Full tracking and reporting
- Trains your employees to be aware of the hazards associated with their vehicles
- Customized to the type of vehicle your employees drive
- Program enrollment required by policyholder to access courses
- All training is accessed from our risk management platform (other online training offered as a policyholder benefit)

**based on coverage purchased, discuss with your agent for more details
