

DUAL and Fleet Cost & Care

Maximize safety and efficiency with digital document management

Simplify fleet management and manage operational risk with Fleet Cost & Care's industry-leading software

Streamline signature and document management

- Generate PDF documents (such as quotes and rental agreements) and email for signing directly from DocuSign. Capture electronic signatures from a smartphone or tablet at the beginning and end of a job.
- Use terms and conditions templates to make it easier to manage the various types of forms you need for different companies, yards, etc,

Help ensure compliance with ease

- Easily requires employees to complete and attach essential items like pre-job inspections and site safety checklists before starting work.
- Configure certificate on requirements to ensure that only employees with the correct credentials are assigned to specific tasks—system will alert you to potential conflicts.

Stay on top of data and extend equipment life

- Be alerted to coming due and past due certifications
- Stay current with your engine hours, odometer meter, preventive maintenance activities, and inspection schedules.
- 360-degree view of down time history, maintenance and repairs, warranty info, and equipment deficiencies helps you
- ELD and GPS integration enables HOS importing from ELD systems, so dispatchers stay compliant when scheduling employees

E-tickets are:

Accessible anywhere with offline mode

Automatically emailed to customer once signature is obtained
